Application/Control Number: 10/083,290 Page 2

Art Unit: 2879

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 29-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 29-31 of co-pending Application No. 10/083,593. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 29-31 of the co-pending application recite applicant's claimed PDP including: a front substrate; a plurality of row electrode pairs, each of two row electrodes of one row electrode pair has a plurality of protruding portions, thereby forming a plurality of discharge gaps between mutually facing protruding portions of the two electrodes; a dielectric layer; a rear substrate; a plurality of column electrodes; and a

Application/Control Number: 10/083,290

Art Unit: 2879

partition wall assembly provided between the substrates, the partition wall assembly including a plurality of longitudinal and lateral walls forming a lattice configuration arrangement and dividing the discharge space into a plurality of discharge cells.

Page 3

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

- 3. Co-pending Application No. 10/153,741 is currently unavailable to the Examiner. Upon availability and depending upon scope of claims of both the co-pending Application No. 10/153,741 and the instant application, the Examiner will further reject instant claims under obviousness type double patenting rejection.
- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim, Kim et al, Mitomo, Amemiya, Amemiya et al and Amemiya et al each are cited for showing a general structure of a PDP including wall assembly and discharge electrodes.

Application/Control Number: 10/083,290
